

# Multi-weapon Electrical Simulator

## GENERAL INFORMATION

The Multi-Weapon Electrical Simulator allows gunners to practice their marksmanship in a controlled environment without the need for live ammunition - thereby improving safety and minimising training costs.

The solution is flexible and can be tailored to a customer's individual needs using existing infrastructure. Pneumatic weapon modifications and support systems allow for a simulated recoil effect to ensure an accurate recreation of live fire.

## SERVICES

- Project Management
- System integration
- System installation
- Logistics (Pre-assemble, package and shipping)
- Commissioning and setting to work
- Training and learning material

## CHARACTERISTICS

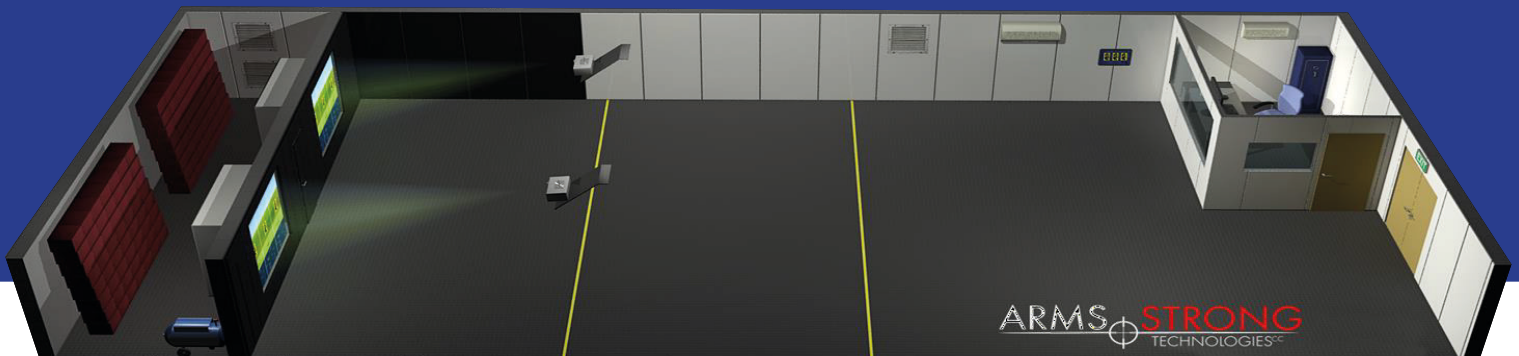

- Includes plug and play pneumatic support system
- Fixed installation or portable solutions
- Uses compressed air recoil systems with invisible laser shots
- Non-permanent weapon conversion kits
- Realistic handgun training models with blowback recoil

### System key components :

- Computer
- Projector
- Detection camera
- Pneumatic support system

### Support for the following weapon types :

- AK-47 Rifle
- R4/R5 rifle
- Pistol (All types)
- PMG
- RPG-7
- Commando 60mm Mortar o12.7mm AA Gun

ARMS STRONG
